

Dear Sir/Ma

Warm greetings.

We write to formally introduce PROJECT GREEN (2026–2036), a long-term regional initiative designed to empower youths across West Africa through awareness creation, skills development, leadership training, and career pathway development in the waste-to-energy and circular economy sectors.

PROJECT GREEN will be implemented across Nigeria, Niger, Benin, Togo, Ghana, Burkina Faso, Côte d'Ivoire, Mali, Guinea, Sierra Leone, Guinea-Bissau, The Gambia, Cape Verde, Senegal, Mauritania, and Liberia, with a strategic focus on building sustainable systems that convert environmental challenges into economic and energy opportunities.

#### The Challenge

Across West Africa, there is a critical shortage of functional learning hubs that practically equip young people with the technical, managerial, and leadership skills required to participate meaningfully in waste management, renewable energy, and circular economy value chains.

#### Our Objectives

PROJECT GREEN seeks to empower youths to:

- Take leadership roles in waste management and sustainable energy sectors
- Operate and manage youth learning hubs powered by sustainable energy solutions
- Conduct research and advocacy to influence local and regional policies on waste management, renewable energy, and the circular economy

#### Implementation Phases

##### Phase One (Years 1–2):

- Project publicity and community building
- Official project launch
- Multi-stakeholder forums

##### Phase Two (Years 3–7):

- Establishment of learning hubs across West Africa
- Regional stakeholders' forums

##### Phase Three (Years 8–10):

- Internationally recognized training programs
- Advanced research initiatives
- Professional certifications in waste-to-energy and circular economy practices

### Partnership Opportunity

In view of your organization's proven expertise and leadership in sustainability initiatives, innovative systems and environmentally friendly solutions, we respectfully invite your partnership towards the fulfillment of PROJECT GREEN in areas such as:

- Technical expertise and knowledge transfer
- Capacity building and training support
- Infrastructure and technology support
- Research collaboration and innovation
- Policy advocacy and stakeholder engagement
- Sponsorship and long-term strategic support

A partnership with PROJECT GREEN represents a unique opportunity to:

- Build future-ready green sector leaders
- Strengthen regional sustainability ecosystems
- Advance shared environmental, social, and economic goals
- Create measurable long-term impact across West Africa

We would welcome the opportunity to discuss this partnership further and explore mutually beneficial collaboration pathways.

Thank you for your time and consideration. We look forward to the possibility of working together to build a greener and more sustainable future for West Africa.

Yours sincerely,  
ThankGod Michael Ukeh  
Team Lead
